- **Test Management & CI/CD:** Squash, Jira, TestRail, Jenkins, Azure DevOps, GitHub Actions
- **Programming & Scripting:** JavaScript, TypeScript, Python, SQL
- **Cloud & Environments:** Azure, AWS, Docker
- **Quality Practices:** Defect & Release Management, Security & Compliance, Agile/Scrum/Waterfall
- **Soft Skills:** Analytical & critical thinking, Attention to detail & accuracy, Effective communication & collaboration, Time management & prioritization, Adaptability & continuous learning,Stakeholder Management

CERTIFICATIONS

- Certified Lead QA Engineer – Micro1
- Certified Senior QA Engineer – Alison
- ISTQB Certified Tester
- Coding Fundamentals – Grasshopper

EDUCATION

Moringa School of Technology
Bachelor's Degree in Software Engineering – Sept 2019

Languages

- English – Fluent
- French – intermediate (B1, learning)

PROFILE SUMMARY

ISTQB-certified QA Engineer with 5+ years of expertise in manual and automated software testing across fintech, ERP, and digital lending platforms. Skilled in ensuring quality and reliability of applications through functional, regression, API, database, and performance testing. Strong background in release management, SDLC processes (Agile, Scrum, Waterfall), and test automation frameworks. Adept at collaborating with cross-functional teams to deliver high-quality, AI-driven and customer-focused financial applications.

PROFESSIONAL EXPERIENCE

Lead QA Engineer - Cashia
Mar 2021 to July 2025

- Led QA for a B2B digital lending platform used across Africa, Middle East, and Asia.
- Designed and executed test strategies covering functional, regression, integration, and performance testing.
- Automated regression and API test suites using Selenium, Cypress, and REST Assured, reducing test cycle time by 40%.
- Collaborated with developers, business analysts, and compliance teams to align product quality with financial regulations.
- Managed defect lifecycle in Jira, ensuring high-quality deliverables across multiple releases.
- Performed database validation with SQL queries for data accuracy and reconciliation.
- Supported release management activities including deployment verification in staging and production.
- Mentored QA engineers and established QA best practices for scalability.

QA Engineer - Nobilis
Feb 2020 to Mar 2021

- Tested ERP and financial applications, focusing on functional, integration, and UAT testing.
- Developed API test cases and executed them via Postman and automated scripts.
- Performed database testing and SQL query validation for reporting accuracy.
- Maintained automated scripts in Selenium and Python, contributing to CI/CD pipelines.
- Reported, tracked, and validated defects in Jira and supported release management activities.

Junior Backend Developer - Safaricom
Feb 2020 to Mar 2021

- Built backend features and automated unit/integration tests in Python and JavaScript.
- Worked closely with QA engineers on system validation and user acceptance testing.
- Delivered UI/UX improvements, contributing to higher customer satisfaction scores.
